### Legende

Frage**text**

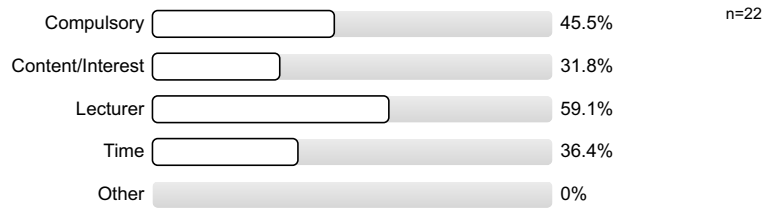

### 1. University wide section

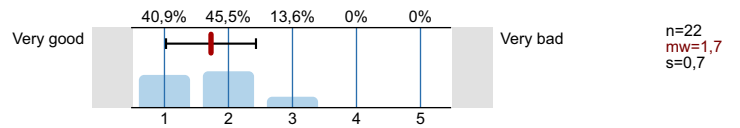

1.1) Gender

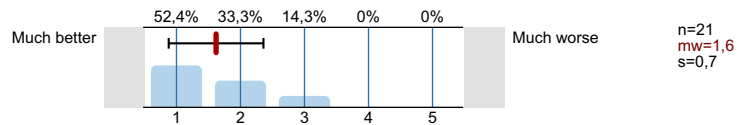

1.2) Reason for attending the course (multiple answers possible):

1.3) Overall, I found the course

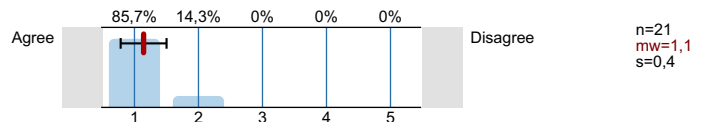

1.4) Compared to other courses in this subject, I found the course to be

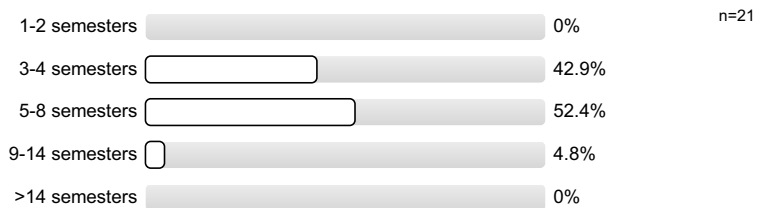

### 2. Questions for the director of studies

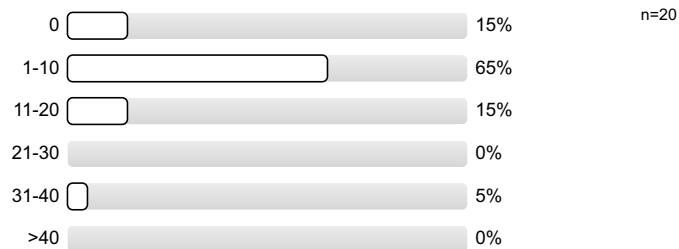

2.1) I have attended the course regularly

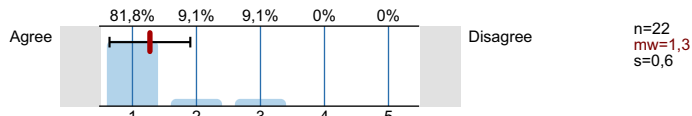

2.2) Number of semesters in this studies

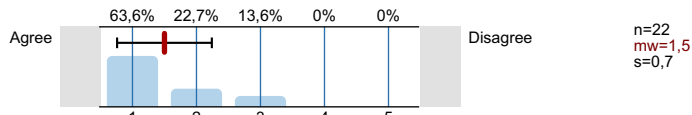

2.3) Workload in addition to study (hours per week)

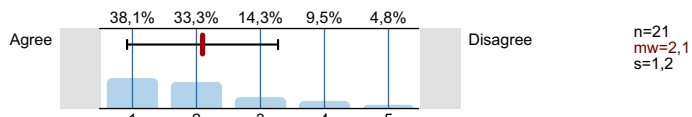

2.4) The lecturer is well prepared for the course

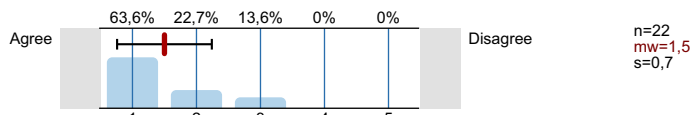

2.5) The lecturer explains content clearly and comprehensibly

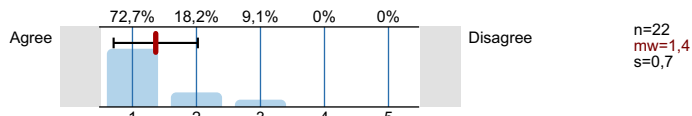

2.6) The lecturer provides proper support outside of classroom

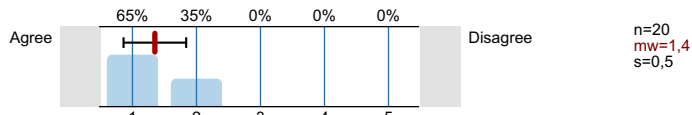

2.7) I can recommend the Lecturer to others

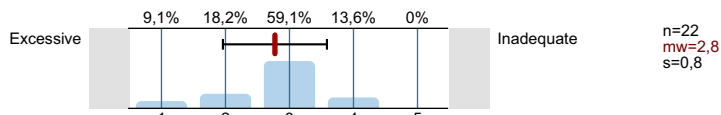

2.8) Appropriate information was given about the aims, contents, methods and assessment criteria

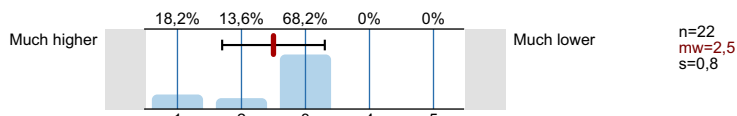

2.9) The course is well organised

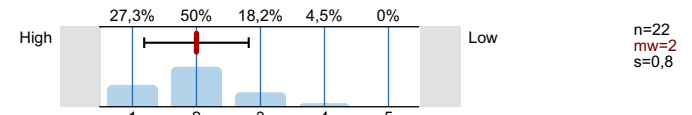

2.10) My pre-existing knowledge, in order to be able to follow the course, was

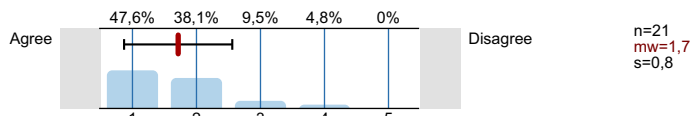

2.11) In comparison to other courses, my workload is

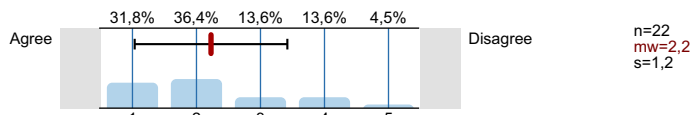

2.12) The continuous participation of the students was

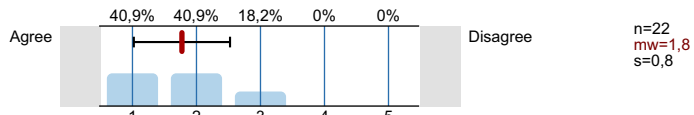

2.13) The content of the course was well-prepared from a didactic perspective

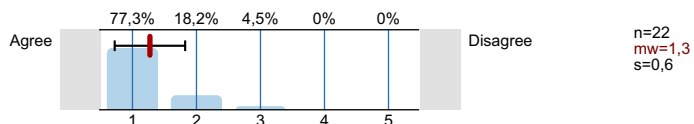

2.14) The course encouraged a deeper engagement with the subject

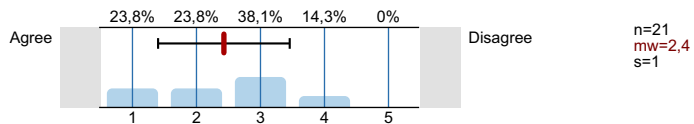

2.15) Various theoretical and methodological approaches are presented and discussed

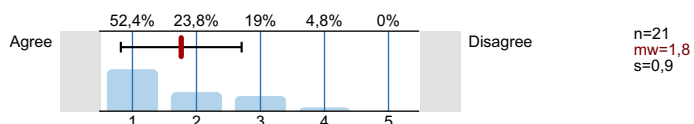

2.16) Students' questions and contributions are paid adequate attention to

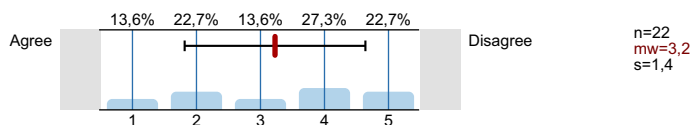

2.17) The applicability of the course to later careers is discernible

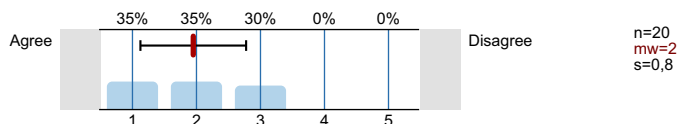

2.18) The provided material and the given literature was helpful

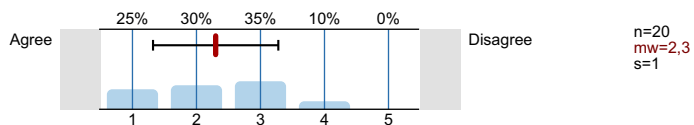

2.19) Communicative teaching methods (e.g. group work) are used

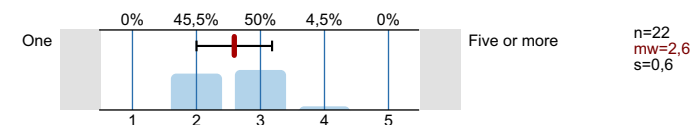

2.20) The course has enhanced my understanding of my study

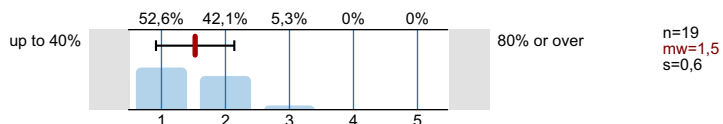

2.21) The offered e-learning content supports the course well

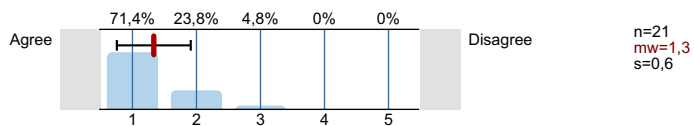

2.22) How many examinations (papers, written exams, projects) must be taken?

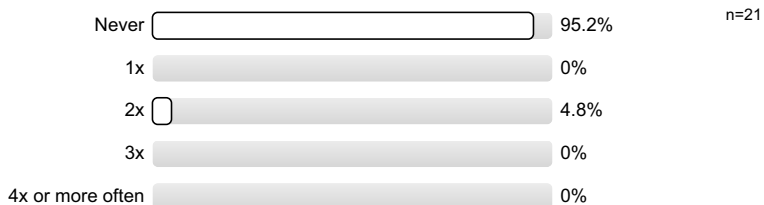

2.23) What proportion of the total grade is accounted for by the most heavily weighted examination?

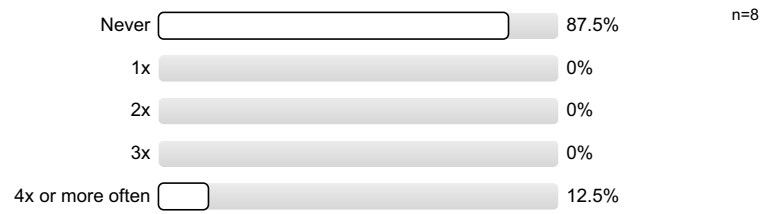

2.24) The arrangement (blocked / regular course hours), day and time of the course is convenient

2.25) Lectures have been cancelled

2.26) If lectures have been cancelled, replacements have been held

## 3. Open questions

<sup>3.1)</sup> I would also like to add (merits, criticism, suggestions for improvements):

Very good explain, persize & showed a lot of patience while answering questions.

It was great to be taught by a lecturer whose english proficiency was so high. It was a bit of a challenge at times but it is definitely great to have the whole course in english. Some times we could have gone into more detail about some subjects.

The test was harder than expected, comparing to the examples!

---

I think this course is very good compared to others!  
Teacher is always ready to explain topics again if there are problems and also answers to emails.

---

I really enjoyed the course!

In comparison to other professors, you did a great job! I like that we don't need to take all 3 exams & that there is no book which we need to buy.

The exam was harder than I thought, but still, the course is great! You're doing a great job!

I liked the english level compared to other courses. Great job!  
More like this!

---

I find the course too difficult for students who are not doing a degree at this institute. I am a student of languages, haven't done mathematics for over 7 years (since I started university) and I am doing this course as EC (Erweiterungscurricula). This course should be either easier for us or not offered to students from other departments.

---
